INTEGRAL

Mechanical and Electrical Services:

New lighting scheme • LTHW system • Ventilation modifications • MCWS • HWS • Power Supplies • Lighting Control • Drainage mods

The Project involved the refurbishment of 10 existing galleries and the formation of a new 'Daylit Gallery' from previous roof plant area. This was a full M&E package of Heating, Ventilation and Electrical.

Contract worked on CDP (Contractors Design Proposals), which as difficulties arose the contractor was to seek the best possible solution to maintain program timescales. Each phased completion achieved, despite building work problems and Grade 1 Listed Building limitations. Variations agreed as the contract went on and final account was within contract constraints. Each section completion was followed by a Curators fit out ready for opening. Clients staff training and operation and maintenance was eased by the Integral Maintenance

team on site. Regular visit during construction to ensure familiarity of the installed services

Client - V&A

Sector: Museum

Location: London

Value: £ 500,000

Contract Period: 15 months
