- > Over 100 dedicated, qualified refrigeration engineers

refrigeration

We provide an extensive range of services across all sectors, delivered across the UK.

Contracting

Our team of industry leading professionals offer vast knowledge and experience to tailor and deliver engineering solutions to meet today's demanding standards.

Integral's flexibility within the market means that capital plant selection and the related services are not tied to any particular manufacturer, we are unrestricted in being able to select the best plant for our customers' application and budget.

Technical Services

Integral provide an extensive range of engineering services to support users and owners of refrigeration systems with compliance to meet mandatory regulations (e.g. DSEAR, PSSR).

Service

Integral deliver unrivalled specialised and dedicated refrigeration service coverage to its customers. We have the capabilities to call upon our teams of skilled service and maintenance engineers, using the latest technology to support our clients' refrigeration, HVAC and air conditioning needs. Integral provide 24 hour, 365 days a year, service support from our purpose built headquarters in Birstall, Leicester.

HVAC

Integral's HVAC engineering and project delivery is optimised through our progressive working practices developed and implemented with our customers. Our tailored packages focus on successfully achieving deadlines and deliverables from design and engineering to manufacture, supply and installation. Ongoing proactive interface and communication with our customers ensure that we meet quality plans, KPI's and project milestones.
